TSCA, Toxic Substances Control Act, Basic Practice Series

In October 2000, Bergeson & Campbell, P.C. (B&C) announced the availability of *TSCA, Toxic Substances Control Act, Basic Practice Series*. The book, which is published by the American Bar Association Section of Environment, Energy and Natural Resources, is intended to assist the legal practitioner, consultant, in-house counsel, or product manager in understanding TSCA fundamentals, EPA's management of chemical products under TSCA, the process by which EPA requires new data for existing chemicals, reporting obligations relevant to both new and existing chemicals, and the thorny issues involved in importing and exporting chemicals. An overview of topics include:

- Executive Summary;
- Scope of Activities Subject to TSCA;
- TSCA Section 4 -- Procedure for Developing Test Data;
- TSCA Section 5 -- Premanufacture Notification Procedures;
- New Chemical Substances Exempt from PMN Requirements;
- TSCA Section 5 -- Regulation of Chemical Substances;
- TSCA Sections 6 and 7 -- Regulation of Existing Chemicals;
- TSCA Section 8 -- Procedures for Reporting and Recordkeeping Requirements;
- TSCA Section 12(b) -- Exports of Chemical Substances;
- TSCA Section 13 -- Procedure for Chemical Substance Imports;
- TSCA Section 14 -- Confidential Information;
- TSCA Section 11 -- Inspection Authority;
- TSCA Sections 15, 16, and 17 -- Enforcement and Penalties; and
- TSCA Section 21 -- Citizens' Petitions.
