

Jim Alwood

Jim Alwood has been a program manager in the Office of Pollution Prevention and Toxics' Chemical Control Division for 25 years. In addition to extensive experience with new chemical review under TSCA, he works on significant new use rules, TSCA biotechnology issues, and now TSCA nanotechnology issues including directing the stewardship program for nanoscale materials under TSCA. He has a Bachelors of Science degree in Biology from Dickinson College and a Masters Degree in Environmental Science from George Washington University.
