

Dr. Kent Anapolle

Dr. Kent Anapolle has a Ph.D. in organic chemistry from the University of Florida. After graduation, he first worked in the chemical industry for seven years, doing research, product and process development on polymers and organic chemical products. He then came to the EPA, where he has worked for over twenty years in the Chemical Inventory Section and the Industrial Chemistry Branch of the Office of Pollution Prevention and Toxics. Kent mainly works on chemical identification and nomenclature of new and existing chemicals as well as TSCA Inventory and reportability questions and issues, while also supporting such Office and cross-cutting Agency efforts as Nanotechnology, High and Medium Production Volume chemicals, the Inventory Update Rule, contract management, and TSCA Inventory compliance.
