

# Decision Logic for Assessing Need of Consortia Management for TSCA Work Plan Chemicals

## Issues to consider for consortia management services:

- Extensive experience with antitrust laws
- Knowledge of federal tax requirements and experience in implementing those requirements properly
- Ability to address challenges in banking needs for collection and disbursements of required EPA fees
- Experience in negotiating reasonable and fair cost shares among members of varying sizes and commercial interests
- Experience in addressing issues related to "latecomer" companies that join after a consortium is formed and operational
- Availability of legal, scientific, and regulatory experts to assist members as needed
- Established working relationships with EPA and other stakeholders

See BCCM overview, "[The Essential Value in Forming TSCA Consortia](#)," for information on how BCCM is uniquely situated to address your company's consortia needs. Please contact us if you wish to explore setting up a consortium with us.
